1. EXECUTIVE SUMMARY

FOUNDATION'S ACTIVITIES IN 2021

COMPETITIONS AND GRANTS

Competition of Research Projects: July 01 – November 11, 2020

RFP: 2020-02

Additional Out-of-Competition Funding (jointly with RUSSCO):

- Daria Bagdasarova: 448 000 RUR ([project summary](#))

Competition of Research Projects: April 30 – November 09, 2021

RFP: 2021-01

Winner (see slide 11):

- Vladimir Lyadov: 377 000 RUR ([project summary](#))

TEAM

Boards: - Directors: 3; - Trustees: 5; - Scientific Advisors: 17

Volunteers: a team of permanent and temporary via [ProCharity](#)

FINANCIALS

Total funds raised: 4 512 608 RUR

- Corporate 1 129 985 RUR
- Individuals 817 076 RUR
- Non-profit "Nuzhna Pomosch" 785 208 RUR
- Meet for Charity Auctions 315 375 RUR
- Grants 989 172 RUR
- Other* 475 792 RUR

Expenditures: 1 645 186 RUR

- **Grants:** 830 000 RUR
- *additionally reserved* 406 000 RUR
- **Administrative:** 815 186 RUR
- **including payroll:** 663 178 RUR

* including return of the grant (Grant Agreement 04/2019) – 463 000 RUR, income from the Federal Budget – 12 792 RUR

GRANTEES ABOUT RAKFOND

Vladimir Konstantinovich Lyadov
Doctor of Sciences, Moscow Clinical Oncology
Hospital № 1

“The grant enabled the purchase of consumables for the research project. This is the first study in our country devoted to a conceptually new approach to preparing exhausted patients with multiple complications for complex oncological surgeries. In fact, RakFond grants are optimal for so-called "research startups" giving scientists a chance to test ideas without any focus on mandatory success. RakFond fills the current funding gap at the initial stage of promising scientific projects, which can later develop into larger-scale research with public funding.”

GRANTEES ABOUT RAKFOND

“ Science cannot be backed only with state funding, therefore, of course, it is necessary to attract private investments and organizations such as RakFond, thereby expanding the opportunities of helping more people. ”

Bagdasarova Darya Valerievna
P.A. Herzen Moscow Cancer Research
Institute – the branch of the Federal State
Budgetary Institution “National Medical
Research Center of Radiology”

SCIENTIFIC RESEARCH SUPPORT

ADDITIONAL OUT-OF-COMPETITION FUNDING	JOINT GRANT OF RAKFOND AND RUSSCO
RFP	Competition of Research Projects in Oncology (RFP 2020-02)
Grantee	Daria Bagdasarova (see slide 10)
RFP: 2021-02 Completed <ul style="list-style-type: none"> • Pre-registration required • Application limited to 7 pages 	COMPETITION OF RESEARCH PROJECTS IN ONCOLOGY 1. Clinical trials: interventional, randomized (preferred), in cancer prevention, diagnostics, monitoring, and treatment, rehabilitation and quality of life. 2. Translational studies: diagnostic and prognostic biomarkers, treatment selection. 3. Basic research.
Budget	up to 500 000 RUR (inclusively)
Timeline	Applications open date: April 30, 2021 Applications due date: September 20, 2021 Notice of award: November 09, 2021
Results	Overall, 17 applications were submitted, 14 of them were sent for scientific review.
Winner	Vladimir Lyadov (see slide 11)

JOINT GRANT OF RAKFOND AND RUSSCO

additional out-of-competition funding RFP 2020-02

DARIA BAGDASAROVA

P.A. Herzen Moscow Cancer Research Institute – the branch of the Federal State Budgetary Institution “National Medical Research Center of Radiology”

Project: The research of multifocal breast biopsy effectiveness in patients with complete clinical response (cCR) after neoadjuvant chemotherapy in order to refuse surgery in complex treatment of breast cancer patients

Funding:
448 000 RUR

Description:
<https://www.rakfond.org/en/2020-02-darya-bagdasarova/>

AWARD WINNER

RFP 2021-01

VLADIMIR LYADOV

Moscow Clinical Oncology Hospital № 1

Project: Prehabilitation in sarcopenic patients with resectable gastro-intestinal tumours

Funding: 377 000 RUR

Description: <https://www.rakfond.org/en/supported-research/>

RESULTS OF SUPPORTED RESEARCH

Search for the markers of microsatellite instability that are diagnostically significant in aggressive lymphomas

Yana Mangasarova
National Medical Research Center for Hematology (Moscow)

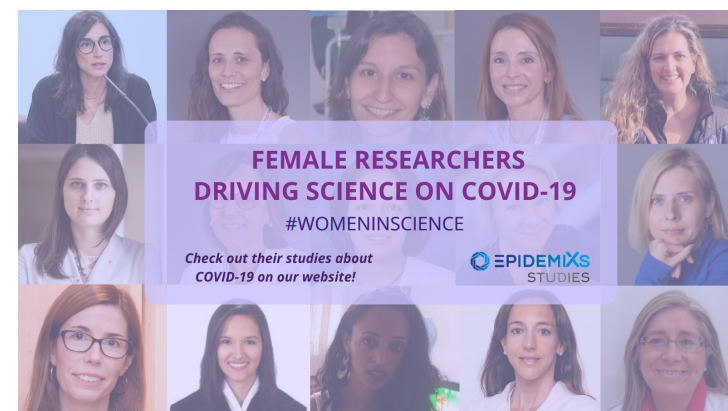

With the support of RakFond, the first part of the project was completed and microsatellite instability MSI-high, EMAST were assessed in patients with primary mediastinal large B-cell cell lymphoma (PMLBCL). Data was presented at international and Russian conferences (EHA, SOHO, Malignant Lymphomas).

It was demonstrated that molecular markers such as loss of heterozygosity (LOH) at short tandem repeat loci, as well as a variant of microsatellite instability EMAST in tumor cells at the onset of the disease, can lead to the failure of standard therapy in a significant number of patients with PMLBCL. Testing for EMAST, especially when combined with PD-L1 (programmed cell death protein ligand) expression, may be important for predicting response to checkpoint inhibitor (CPI) therapy. Patients with PMLBCL and high levels of PD-L1 expression should be considered as priority candidates for immunotherapy. Immunohistochemical predictors of the efficacy of CPI immunotherapy are currently being evaluated.

Research is ongoing. The final results of the study are anticipated in 2022.

EXPERT SUPPORT OF RESEARCH

CHRONOS19: Non-interventional cohort study "Registry of patients with hematologic disease and COVID-19 in Russia"

- This multicenter study allowed to retrieve information about the novel coronavirus infection fast, which led to the development of treatment recommendations during and after COVID-19, vaccination strategies.
- The research data was presented over 20 times during 2 years at the international meetings (ASCO, ASH, EHA, EWALL), local conferences (Hematology Congress, Symposium «Malignant Lymphoma», «Workshop on Leukemia and Lymphoma» and others, educational seminars, and lectures, educational modules were developed).
- 16 publications (including 7 in English).
- Received ASH AWARDS 2020 for the poster «Patients with Hematologic Disease and COVID-19 in Russia».
- International cooperation on the COVID-19 (EpidemiXs).
- The research was presented at the webinars by Hadassah Institute of Oncology, EpidemiXs, and during the 44th World Hospital Congress.
